Headphone and AUX connections

Symptom	What to do

No or low sound from speakers	• Make sure:
	  – Speakers are on.
	  – All cables are fully inserted and power cord is connected.
	  – Computer and other sources are not muted.
	  – Volume of computer and other sources are set to 75 percent of maximum volume.
	• Adjust volume on speaker, computer, keyboard, media player and music application.

Sound is distorted or you hear static	• Decrease volume of source. • Increase volume of speakers.
Background noise when audio is not playing	• Decrease volume of speakers. • Increase volume of other sources.
Power light is dim (power save mode = 30 minutes inactivity)	• Play audio.
Speakers are dirty	• Clean with a soft, dry cloth. **Note:** Do not spray liquid on the speakers. • Lightly vacuum grills.
Control pod does not adhere to tabletop	• Clean bottom surface with lint-free, slightly damp cloth.
