Price per piece

DESCRIPTION

The 2-band SONORA speaker system is specially designed for public and private spaces. Excellent surface treatment, modern and elegant design allows perfect integration into any space. The system is also ready for outdoor use, the speakers are covered with an aluminum grill, have protection against UV radiation, and thanks to the rigid and solid enclosure made of ABS, it is waterproof (IP-66). The speaker system is equipped with a high-quality 4" bass and 0.5" tweeter with a power of up to 30W, thanks to which it provides excellent, clean sound quality without distortion. It contains a built-in 100V transformer with an adjustable power input of 30/15/7.5/3.75W for 100V or 30W for 8ohm. The package includes all the necessary accessories for quick and easy installation: an adjustable weatherproof mounting bracket that allows the speaker to be mounted vertically or horizontally, stainless steel screws and a steel safety cable. It is suitable for music production or background sound in public places, such as restaurants, cafes, supermarkets, shopping centers, but also for home terraces, winter gardens, etc. Price per piece.
