

CINEMA 800

DOLBY ATMOS SOUND BAR 5.1 SYSTEM

Klipsch®

DOLBY ATMOS CINEMA IN THE HOME

The Cinema 800 Dolby Atmos Sound Bar, with 800 watts of power, brings decades of professional cinema acoustic research and development to your home, meaning all your movies and TV shows will have the same power, dynamics, and detail as the movie theater. Dolby Atmos technology creates overhead sound to deliver cinematic surround sound with greater realism.

EASY PLUG AND PLAY SET UP

The Cinema 800 is designed to quickly connect to your TV. Simply plug in the included HDMI cable or an optical cable to seriously upgrade your TV sound, using your TV's remote to control it. The included 10" wireless subwoofer is pre-paired to connect automatically out of the box, for a hassle free set up in just minutes. Next generation HDMI eARC connectivity means true Dolby Atmos sound and ultra-high definition video with a single HDMI cable.

WIRELESS MULTI-ROOM STREAMING

Built-in universal Wi-Fi works with Google Assistant, Amazon Alexa, and Spotify Connect, allowing you to add the Cinema 800 Dolby Atmos Sound Bar to your existing smart home ecosystem and play your favorite streaming music service anywhere in your home.

BEST-IN-CLASS 10-INCH WIRELESS SUBWOOFER

The Cinema 800 comes with a powerful wireless 10" subwoofer that you can place anywhere in your room, for true Klipsch cinema sound. Wireless 2.4 GHz technology automatically connects the sound bar and the subwoofer together, while a wired subwoofer output allows you to add a second subwoofer to your setup or simply replace the included wireless subwoofer with the subwoofer of your choice.

8K PASSTHROUGH

Features HDCP 2.3, for 8K HDR video pass-through for use with state-of-the-art TVs and HDMI sources.

7.1.4 DOLBY ATMOS DECODING

With Dolby Atmos processing in the sound bar, The Cinema 800 Dolby Atmos creates overhead sound to deliver cinematic surround sound with greater realism, detail, and immersion.

DIALOG ENHANCEMENT MODES

All new custom tuned dialog modes not only raise the volume of the dialog in your TV shows and movies, but also optimize the EQ setting of the system, to ensure the dialogue is crisp, clear, and exceptionally intelligible no matter what's happening on screen. Three levels of dialogue enhancement ensure that you can find the perfect setting for your needs.

BLUETOOTH® WIRELESS TECHNOLOGY READY

Works great with all Bluetooth-enabled smartphones, tablets and computers - allowing you to play music direct from your device, while the latest Bluetooth 5.0 chip means better connectivity, better range, and better battery life on your connected devices.

HORN-LOADED PERFORMANCE

The Cinema 800 is a true 5.1 system, featuring a dedicated center channel speaker for enhanced vocal clarity, and horn-loaded tweeters, just like our legendary professional cinema speakers, for dynamic power in every detail of your music and movies. The Cinema 800 is crafted from high-quality wood materials, just like legendary Klipsch speakers.

MOTION SENSING REMOTE

The included premium remote features motion-sensing LED buttons so you're in full control, even when the lights are low. In addition to volume and input selection, the remote lets you adjust subwoofer level, surround level, and sound mode with the push of a button to dial in the perfect listening experience right from your seat.

DOLBY AUDIO® BUILT IN

The built-in Dolby Digital and Dolby Digital Plus processing enables powerful cinema experiences with discrete processing for dialog and (optional) surround channels.

WIRELESS SURROUND SOUND

Independent wireless surrounds give you the versatility to place anywhere with no extra wiring needed.
