Q-SYS NV-32-H (Core Capable)

Native Network Video Endpoint for Q-SYS

The NV-32-H (Core Capable) is a multipurpose, software-configurable video endpoint native to Q-SYS that offers two operating modes to choose between, based on the needs of the application.

CORE MODE

Consolidated Q-SYS AV processor, control engine, and local HDMI video switcher to support video collaboration in small and medium sized meeting rooms and classrooms.

Native HDMI and audio distribution without the need for additional control processors, bridges or complicated programming.

Like all Q-SYS devices, the NV-32-H (Core Capable) offers native integration and control, simplifying setup, configuration and firmware management while eliminating the need for advanced programming knowledge.

PERIPHERAL MODE

Q-SYS NV-32-H (Core Capable)

CORE MODE

- **Fully integrated Q-SYS processor:** 'Core Mode' enables the same integrated audio, video and control features as the rest of the Q-SYS Core portfolio, but with I/O and processing capabilities specifically tuned for video collaboration in small meeting rooms or classrooms.
- **Onboard HDMI switch:** The 3 x 2 HDMI I/O enables in-room users to easily share presentation or video content from their laptops or other video sources (video encoding/decoding is unavailable in this mode). Onboard HDMI switching is 3 x 1 @ 4K60 or 3 x 2 @ 1080p.
- **Consolidated AV functionality:** The 1 RU, half-rack unit consolidates disparate AV functionality to free up physical space and reduce hardware and installation costs.

PERIPHERAL MODE

- **Quality:** The NV-32-H provides high-quality, low latency video streaming with resolutions of up to 4K60 4:4:4 over a standard gigabit network.
- **Network optimized compression scheme:** Q-SYS Shift™ video compression codec actively adjusts network bandwidth resources according to content, affording massive network savings for common meeting room content without compromising on the ability to stream full-motion video.
- **Single device solution:** The NV-32-H is configurable as an encoder or decoder, simplifying the ordering and specification process and providing flexibility for meeting spaces.
- **Simultaneous streaming:** With 3x HDMI inputs and 2x HDMI outputs, the NV-32-H enables flexible room design scenarios, such as simultaneous 1080p60 streaming for dual-monitor rooms, with a single device. It also enables soft codec applications that support dual video output.
- **Local output switching:** When set as a decoder, the NV-32-H can provide local video source selection in addition to displaying content from network streams.
- **Test your network:** The NV-32-H features a Network Test feature, accessible in Q-SYS Designer Software, that allows you to send full video data loads across your network to check for potential network configuration issues without needing actual video sources and/or sinks connected.

SHARED BENEFITS

- **Native integration and control:** Q-SYS software-based control allows you to add native Q-SYS Products, including the NV-32-H, to your system design and route them anywhere on the network with simple drag-and-drop components. This simplifies setup, configuration, and firmware management and eliminates the need for additional hardware or advanced programming knowledge.
- **Q-SYS AV Bridging:** The NV-32-H allows users to connect their device via USB to integrate Q-SYS audio and camera feeds easily enabling remote meetings.
- **Q-SYS audio integration:** The NV-32-H allows audio feeds from connected video sources to be routed natively, along with the video stream, to any other endpoint on the network, or use the HDMI output as a Q-LAN audio destination for source audio, paging or any other Q-SYS asset. Additionally, the onboard analog audio output allows for direct connection of Q-SYS non-networked amplifiers, external loudspeakers, or audio recorders.
- **USB HID Routing over IP:** Allows users to connect USB HID devices (keyboard, mouse or touchscreen) and route the signals over the network, simplifying installation and reducing costs by removing equipment from the room.

Q-SYS NV-32-H (Core Capable)

CONTROL

- **RS-232:** Three-pin Euro terminal connection to control third-party devices with Q-SYS Control, user configurable.
- **GPIO:** Three inputs and two outputs for control of third-party devices via Q-SYS Control, user configurable.

USB

- **USB HID routing over IP:** Support for USB HID sources, including keyboard, mouse, and touch screen.
- **Q-SYS AV Bridging:** The NV-32-H is a native endpoint for Q-SYS AV Bridging. This feature is available in both Core and Peripheral Mode. The NV-32-H allows users to connect their device via USB to integrate Q-SYS audio and camera feeds by emulating a webcam video driver, AEC speakerphone audio driver, and multi-channel soundcard driver over a single USB connection.

AUDIO

- **Network audio:** Use a total network channel count of 40x32, including Q-SYS native audio channels or Dante channels (licensable up to 32x32).
- **HDMI audio input:** Each HDMI input is able to receive up to eight channels of PCM audio, which are routable within Q-SYS Designer Software.
- **HDMI audio output:** Each HDMI output has the ability to output up to eight channels of PCM audio, making each HDMI output a full-featured Q-SYS audio destination for source audio content, or any other Q-SYS audio feature such as paging, audio playback etc.
- Supports up to three (3) Q-SYS NM-T1 network tabletop microphones.
- **Analog audio input:** Mic/line input on a 3.5 mm TRS connector, routable within Q-SYS Designer Software, for direct connection of microphones or audio players.
- **Analog audio output:** Line output on a 3.5 mm TRS connector, routable within Q-SYS Designer Software, for direct connection of QSC non-networked amplifiers, external speakers or audio recorders.

SECURITY

Supports AES-128 encryption for audio and video signals from encoders to decoders as well as 802.1x authentication (available in Q-SYS Designer Software v8.4 or higher).

- **Content Protection:** HDCP 2.2 compliant.
