1.1 Information regarding the use of loudspeakers

Potential risk of personal injury

Never stand in the immediate vicinity of loudspeakers driven at a high level. Professional loudspeaker systems are capable of causing a sound pressure level detrimental to human health. Seemingly non-critical sound levels (from approx. 95 dB SPL) can cause hearing damage if people are exposed to it over a long period.

In order to prevent accidents when deploying loudspeakers on the ground or when flown, please take note of the following:

- When setting up the loudspeakers or loudspeaker stands, make sure they are standing on a firm surface. If you place several systems on top of one another, use straps to secure them against movement.
- Only use accessories which have been tested and approved by d&b for assembly and mobile deployment. Pay attention to the correct application and maximum load capacity of the accessories as detailed in our specific "Mounting instructions" or in our "Flying system and Rigging manuals".
- Ensure that all additional hardware, fixings and fasteners used for installation or mobile deployment are of an appropriate size and load safety factor. Pay attention to the manufacturers' instructions and to the relevant safety guidelines.
- Regularly check the loudspeaker housings and accessories for visible signs of wear and tear, and replace them when necessary.
- Regularly check all load bearing bolts in the mounting devices.

Potential risk of material damage

Loudspeakers produce a static magnetic field even if they are not connected or are not in use. Therefore make sure when erecting and transporting loudspeakers that they are nowhere near equipment and objects which may be impaired or damaged by an external magnetic field. Generally speaking, a distance of 0.5 m (1.5 ft) from magnetic data carriers (floppy disks, audio and video tapes, bank cards, etc.) is sufficient; a distance of more than 1 m (3 ft) may be necessary with computer and video monitors.

2.1 Product description

The 12S-SUB is a compact high performance subwoofer for use with d&b xS-Series loudspeakers. The cabinet houses a long excursion 12" neodymium driver in a bass-reflex design.

The 12S-SUB frequency response extends from 45 Hz to 130/100 Hz.

The enclosure is constructed from marine plywood with an impact resistant black paint finish. The front of the cabinet is protected by a rigid metal grill backed by an acoustically transparent foam. Four rubber feet prevent cabinet movement and protect the bottom panel against scratching.

The cabinet is Ball Impact Resistant according to DIN 18032-3.

Rigging components

The 12S-SUB side panels are each equipped with a pair of M10 threads to accept the Z5412 Horizontal bracket 12S-SUB. The threaded inserts are covered by dummy caps in cabinet color. The caps must be removed before mounting any accessories.

2.2 Connections

The cabinet is fitted with a pair of NL4 connectors and a two pole screw terminal block (ST). All four pins of both NL4 connectors are wired in parallel. The cabinet uses the pin assignments 2+/2-. Pins 1+/1- are designated to full range cabinets.

Pin equivalents of the applicable connector options are listed in the table below.

NL4	1+	1-	2+	2-
ST	n.a.	n.a.	+	-

Fixed cable connection

The 12S-SUB loudspeaker is supplied with a cover plate [1] and a rubber grommet feed through [2]. For indoor operation, these items can be used to hide the connector panel, if required. For unprotected outdoor operation, the connector panel must be covered, i.e. both items must be used to achieve an IP degree of protection of IP34.

Fig. 4: Installing the fixed cable connection

Fig. 5: NL4 cable connection with cover plate [1]

To install the fixed cable connection, proceed as follows:

Tools required: Philips screw driver (#PH2).

1. Prepare the rubber grommet and the connection cable.
2. Remove the knockout opening in the cover plate and attach the rubber grommet correspondingly.
3. Insert the connection cable through the rubber grommet and connect the cable wires to the screw terminal.
⇒ Observe the correct polarity!
4. Undo the four screws of the connector panel.
5. Push the cover plate towards the connector panel until it fits into place.
6. Finally fix the cover plate together with the connector panel using the four screws.

NL4 connection with cover plate

The two NL4 connector sockets of the cabinet's connector panel are located in a recess to allow the use of the cover plate **[1]** together with NL4 cable connectors, as shown in the graphic opposite.

Note: Neutrik NL4FC type connectors must be used for this option.

The cover plate is equipped with two knockout openings to allow daisy chaining of the loudspeaker.

To use the NL4 connection, proceed in the same manner as described above in the section entitled ⇒ "Fixed cable connection" on page 5.

Faston type connector, male single PG (standard), dual PG (optional)

WR option (Weather Resistance)

A number of d&b loudspeakers are available in special options suitable for different types of installed applications and environmental conditions. The following options are available:

- Weather resistant (WR): This option is suitable for outdoor use. The cabinets have an impact and weather protected black PCP (Polyurea Cabinet Protection) finish.

WR cabinets are equipped with a recessed connector panel including a Faston type connector (2 x 6.3 mm, female). A cover plate which accepts single or dual PG cable glands (Type PG13.5 for cable diameters from 6 - 12 mm) is enclosed, as shown in the graphic opposite.

NOTICE!

The WR option enables operation of loudspeakers in changing ambient conditions, however it is not intended to enable permanent, unprotected operation of loudspeakers outdoors.

- Provide an additional cover over the loudspeakers.
- Aim the cabinets either horizontally or with a downward tilt.

To install the fixed connection cable, please proceed as follows:

Tools required: Screw driver (#T20).

Note: Observe the correct polarity of the cable
Brown (+) / Blue (-).

1. Insert the connection cable through the PG screwing and connect the male connector to the female connector.
2. Push the cover plate towards the connector panel until it fits into place.
3. Fix the cover plate to the connector panel using the four countersunk screws.

2.3 Operation

NOTICE!

Only operate d&b loudspeakers with a correctly configured d&b amplifier, otherwise there is a risk of damaging the loudspeaker components.

Applicable d&b amplifiers:

10D/30D/D6/D12/D20/D80.

Application	Setup	Cabinets per channel
12S-SUB	12S-SUB	2

2.3.1 Controller settings

For acoustic adjustment the 100 Hz function can be selected.

Fig. 6: 125-SUB frequency response, standard and 100 Hz modes

Fig. 7: 125-SUB cabinet dimensions in mm [inch]

100 Hz circuit

If the 100 Hz circuit is selected, the upper operating frequency of the system is reduced from 130 Hz to 100 Hz.

2.4 Technical specifications

125-SUB system data

Frequency response (-5 dB standard)	45 Hz - 130 Hz
Frequency response (-5 dB 100 Hz mode)	45 Hz - 100 Hz
Max. sound pressure (single cabinet, 1 m, free field)	
with 10D/D6	124 dB
with 30D/D20/D12	127 dB
with D80	127 dB
	(SPLmax peak, pink noise test signal with crest factor of 4)

125-SUB loudspeaker

Nominal impedance	8 ohms
Power handling capacity (RMS/peak 10 ms)	300/1600 W
Components	1 x 12" driver
Connections	2 x NL4
	1 x screw terminal (ST - up to 4 mm ² /AWG 11)
	WR option: Faston type connector (2 x 6.3mm)
Pin assignment	NL4: 2+/2-
	WR option: brown + / blue -
Weight	16 kg (35 lb)

3.1 EU conformity of loudspeakers (CE symbol)

This declaration applies to:

d&b Z1590/Z1630 12S-SUB loudspeaker

manufactured by d&b audiotechnik GmbH & Co. KG.

All product variants are included, provided they correspond to the original technical version and have not been subject to any later design or electromechanical modifications.

We herewith declare that said products are in conformity with the provisions of the respective EC directives including all applicable amendments.

A detailed declaration is available on request and can be ordered from d&b or downloaded from the d&b website at www.dbaudio.com.

3.2 WEEE Declaration (Disposal)

Electrical and electronic equipment must be disposed of separately from normal waste at the end of its operational lifetime.

Please dispose of this product according to the respective national regulations or contractual agreements. If there are any further questions concerning the disposal of this product, please contact d&b audiotechnik.

WEEE-Reg.-Nr. DE: 13421928
