T10S

The T10S is a powerful yet compact active subwoofer, designed to extend the bass response of any nearfield studio monitor. However, the subwoofer's performance, features and connectivity are engineered specifically to complement ADAM Audio's T5V and T7V speakers.

Optimized for T-Series speakers

Equipped with a down-firing 10" woofer and a 130 W Class-D amplifier, the T10S' frequency response ranges from 28 Hz to 120 Hz and offers an impressive max. SPL of 104 dB. An internal adjustable two-channel crossover allows calibration of the bass signal and provides optimal performance of the total system. The options at the rear of the subwoofer allow for varied adjustments which compensate for room acoustics or they offer more control for satellites attached.

While reciting the T Series design language, the T10S is one of the most compact subwoofers in its class, which allows it to be easily integrated in any studio environment. The acoustic performance was optimized by four high grade flexible rubber feet that prevent the sound from exciting the floor and a spacious rear facing bass reflex port for an optimized airflow.

Basic technical data

- 10" Subwoofer
- Amp. Power RMS: 130 W
- 28 Hz - 120 Hz
- Max. peak SPL at 1 m: ≥104 dB
- 5 Year Warranty

Reviews & Testimonials

The T5V and T7V are great speakers in their own right, but the T10S sub brings them to life.

[Lewis Noke-Edwards / MIXDOWN Magazine]

The Adam Audio T10s is a solid and powerful subwoofer, which is more than able to extend the low-end of smaller and middle-sized monitoring setups.

[Felix Klostermann / bonedo.de]

In terms of size and performance, the compact and affordable T10S is sized to match and perfectly complements the T5V and T7V monitors.

[Anselm Goertz / Sound & Recording]
